### **DETAILED ACTION**

## Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on August 21, 2006 has been entered.

## Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 3. Claims 19-27 are rejected under 35 U.S.C. 102(e) as being anticipated by Tomoika et al. (6,606,748) [Tomoika].

Regarding claims 19, 23, and 27, Tomoika discloses a method, system, and computer program product embodied on a computer readable medium for synchronizing and propagating changes to an event comprising:

Art Unit: 2623

assigning means for assigning an event an event identifier (fig. 1, which collects the program guide data and parses it into individually accessible portions of event data, referred to as "framework data" and "variation data", col. 9 line 66 – col. 10 line 45);

first registering means for registering said event in a first table (the first table is the aforementioned "variation data", col. 14, lines 35-45 and col. 20, lines 28-30) wherein said first table stores the event identifier and an event trigger (col. 20, lines 11-24);

second registering means for registering interests of another event in a second table (creation of the management data in the management data storage section, col. 11, lines 1-15 and col. 18, lines 47-67) wherein said second table stores a procedure to execute for said event trigger (such as for program shifts, if a first program is lengthened by an amount, subsequent programs on the same channel must then be altered accordingly, col. 20, lines 45-65);

changing means for changing said event wherein said change generates an event trigger (col. 18, lies 24-31, new variation data is a change to one or more event, and will include an event trigger generated by the information provider regarding the changes, col. 20, lines 11-24 and 45-65);

first inspecting means for inspecting said first table to identify said event trigger for said generated event trigger (fig. 2, which includes means for inspecting the variation data storage section 12B);

Art Unit: 2623

second inspecting means for inspecting said second table for said procedure to execute upon identifying said event trigger for said event identifier (fig. 2, which includes means for inspecting the management data storage section 12C); and

executing means for executing said procedure to change one of said other events in response to identifying said procedure upon inspecting said second table (col. 20, lines 45-65).

Regarding claims 20 and 24, Tomoika discloses the method and system of claims 19 and 23, wherein said first inspecting means uses said event identifier (to identify the even being changed, such as the duration of a particular movie, col. 20, lines 45-65).

Regarding claims 21 and 25, Tomoika discloses the method and system of claims 19 and 23, wherein said second inspecting means uses said event identifier and said event trigger (in the case of an extended movie, the movie itself is recognized by the second means in addition to the value by which its duration is being extended, col. 20, lines 45-65, when being manipulated according to the management data, col. 19, lines 1-15).

Regarding claims 22 and 26, Tomoika discloses the method and system of claims 19 and 23, wherein execution of said procedure modifies a data model

Art Unit: 2623

(the program guide seen in fig. 5, wherein the changes taking place are shown in fig. 4).

#### Conclusion

4. The following are suggested formats for either a Certificate of Mailing or Certificate of Transmission under 37 CFR 1.8(a). The certification may be included with all correspondence concerning this application or proceeding to establish a date of mailing or transmission under 37 CFR 1.8(a). Proper use of this procedure will result in such communication being considered as timely if the established date is within the required period for reply. The Certificate should be signed by the individual actually depositing or transmitting the correspondence or by an individual who, upon information and belief, expects the correspondence to be mailed or transmitted in the normal course of business by another no later than the date indicated.

Art Unit: 2623

# **Certificate of Mailing**

| I hereby certify that this correspondence is being deposited with the United States Postal Service with sufficient postage as first class mail in an envelope addressed to: |
|---|
| Commissioner for Patents P.O. Box 1450 Alexandria, VA 22313-1450  |
| on<br>(Date)  |
| Typed or printed name of person signing this certificate:   |
| Signature:  |
| Registration Number:  |
| Certificate of Transmission   |
| I hereby certify that this correspondence is being facsimile transmitted to the United States Patent and Trademark Office, Fax No. ( ) on  (Date)                           |
| Typed or printed name of person signing this certificate:   |
| Signature:  |
| Registration Number:  |

Please refer to 37 CFR 1.6(d) and 1.8(a)(2) for filing limitations concerning facsimile transmissions and mailing, respectively.

Art Unit: 2623

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dominic D. Saltarelli whose telephone number is (571) 272-7302. The examiner can normally be reached on Monday - Friday 7:00am - 4:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John Miller can be reached on (571) 272-7353. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
